Quiet Solution Introduces Lowest Cost Soundproofing Panel on the Market

QuietRock® 510 as low as \$39.95 MSRP

Orlando, Fla. – Quiet Solution, the nation’s leading manufacturer of soundproofing products, is making high-performance noise reduction more affordable with QuietRock® 510 soundproof drywall, the most cost-effective sound damping wall panel on the market.

With ten patents pending and more than 20 million square feet of product installed, Quiet Solution is leading the charge for soundproofing solutions in the building industry. “We offer several options for soundproofing drywall. QuietRock 510, as low as \$39.95 per 4-by-8 sheet MSRP, is our most affordable for residential and commercial construction, in particular for remodels and upgrades,” said Kevin Surace, president and CEO of Quiet Solution. “This product makes it easy and economical for builders, architects and contractors to provide the highest quality soundproofing to their customers.”

Available nationwide, QuietRock 510 has a suggested retail price as low as \$39.95 per 4-by-8-foot panel.

Features and Benefits

QuietRock 510 delivers solid noise reduction, with sound transmission class (STC) ratings of 49 to 52 in typical remodel situations, and up to STC 68 depending on construction techniques and combination of materials. QuietRock 510 drywall panels are ½ inch thick and come in panel sizes of 4 feet wide by 8, 9, 10 or 12 feet long.

- Installs easily with score-and-snap sizing (no saw required)
- Outperforms other soundproofing methods, including the use of soundboard and resilient channels
- Hangs and is finished like standard drywall
- Continues to reduce noise even when fixtures are installed, such as shelves or lamps

“With more projects going zero lot line, we look like heroes for suggesting QuietRock for bedrooms, party walls and in our builds by freeways and busy streets,” said Terry Emry, owner of General Construction, a general contractor located in Concord, Calif. “QuietRock installs just like regular drywall, so it doesn’t take a crew any additional time. And with the lower cost of the new QuietRock 510, we can specify soundproof drywall as an easy value-add for our spec builds and remodels.”

Helping to service anticipated market demand, Quiet Solution products are available from thousands of dealers across North America. In addition to offering the new, low-cost QuietRock 510, Quiet Solution dealers carry a full range of QuietRock models, as well as other soundproofing building materials, such as QuietWood, coatings, sealants and adhesives.

ABOUT QUIET SOLUTION

Quiet Solution is America’s most trusted manufacturer of soundproofing products. As a technology leader, it provides world-class residential and commercial building materials that support sustainable construction and enhance quality of life. With more than 20 million square feet of QuietRock® installed, patent-pending products and technologies include QuietRock® soundproof drywall, QuietWood® and QuietHome® high-STC windows. Quiet Solution products provide easy, reliable and cost-effective noise reduction, ranging from low-cost panels to the only THX-certified soundproofing in the world. The company’s environmentally friendly products are manufactured in the United States and available through more than 4,500 dealers. The company is headquartered in Silicon Valley.
